

# Adobe® GoLive® version 6.0

## Frequently Asked Questions

---

### Frequently asked questions about Adobe GoLive 6.0

#### What is GoLive 6.0?

Adobe® GoLive® 6.0 is the latest version of the award-winning web authoring tool from Adobe Systems. An end-to-end tool for everyone from the designer to the hand coder, GoLive 6.0 helps Web and cross-media professionals develop, architect, and manage dynamic content for the Web and wireless devices everywhere.

#### How does GoLive 6.0 address the needs of Web and cross-media professionals?

GoLive 6.0 streamlines your team's workflow by bringing together Web authoring, dynamic publishing and site/file management so that designers and developers can vastly improve team collaboration and deliver Web projects in less time, with less effort. New features and enhancements in GoLive 6.0 deliver creative options and streamline the production process for Web designs that bridge the gap from print to web to wireless without complicated recoding or redesigning.

#### Does GoLive 6.0 support Mac OS X as well as older Mac OS?

Yes. GoLive runs on Mac® OS X 10.1 (Native and Classic) and Mac OS 9.1 and 9.2.

#### Does GoLive 6.0 support Windows XP?

Yes. GoLive runs on Windows® XP, 2000, ME, and 98.

#### What is new in GoLive 6.0?

New features in GoLive 6.0 allow you to:

- ◆ Improve your team collaboration with versioning and site management support in the new, integrated Adobe Web Workgroup Server.
- ◆ Integrate and optimize PSD, AI, SWF, and LIV files just by dragging and dropping native files thanks to Adobe SmartObjects and variable support.
- ◆ Easily generate dynamic content for e-commerce sites with the Dynamic Content Wizard and native support for ASP, PHP, or JSP.
- ◆ Repurpose content directly from InDesign 2.0 with cross-media capabilities including XML support.
- ◆ Ensure your code is W3C-compliant and/or accessible with the DTD-profile enabled syntax checker and the Accessibility Reporter.
- ◆ Reach global audiences anywhere, anytime with visual wireless authoring support for WML, XHTML, and CHTML.
- ◆ Create rich media sites with GoLive's built-in QuickTime authoring tool and SMIL authoring support.
- ◆ Customize GoLive by adding new functionality with a rich array of third-party JavaScript Actions and Extensions, with more available at the AdobeXChange - [www.adobexchange.com](http://www.adobexchange.com).
- ◆ Easily design user interaction and site information diagrams using built-in Information Architecture features.

For a more complete description of new features in GoLive 6, please visit [www.adobe.com/golive](http://www.adobe.com/golive).

#### What GoLive content is available on the Adobe Xchange site?

GoLive users can download additional actions, extensions, site templates, and tutorials.

## System Requirements

### Windows client

- Intel® Pentium® II processor or faster
- Microsoft® Windows® 98, Windows 2000, Windows ME, Windows XP
- 96 MB of available RAM, minimum (128 MB highly recommended)
- 90 MB of available hard-disk space
- CD-ROM drive

### Mac OS

- PowerPC® G3 processor or faster
- Macintosh® OS version 9.1, 9.2, or Mac OS X 10.1
- 64 MB of available RAM, minimum; 128 MB of available RAM, highly recommended
- 50 MB of available hard-disk space
- 800x600 or greater monitor resolution; 1024x768 recommended
- CD-ROM drive

## Additional Requirements for the Workgroup Server

### Windows

- Intel® Pentium® III processor or faster (600MHz or higher recommended)
- Microsoft® Windows® 2000 or Windows XP
- 96 MB of RAM minimum (128 recommended)
- 150 MB of available hard-disk space

### Mac OS

- PowerPC® processor (G3 or G4 required for Macintosh OS 10.1)
- Macintosh® OS 10.1 (Native)
- 96 MB of available RAM, minimum (128 MB highly recommended)
- 150 MB of available hard-disk space

## Is there a GoLive SDK?

Yes, and it's included with every copy of GoLive 6.0.

## What is the Adobe Web Workgroup Server?

A new site management and collaboration tool, the Adobe Web Workgroup Server is a server-based centralized asset management tool that not only manages the check-in and checkout of files, but also manages resources, including tracking when links are changed. Improving team efficiency and eliminating common project management headaches, the Workgroup Server provides side-by-side comparison of file versions directly in the GoLive authoring environment as well as the ability to rollback to previous versions of files. The additional features provided by the Adobe Web Workgroup Server can also benefit development of a single-user site.

## How does GoLive 6.0 compare to Macromedia Dreamweaver 4.0?

Unlike Dreamweaver 4.0, GoLive 6.0 incorporates three tools in one: a web authoring tool, a dynamic content publisher, and collaboration tools including asset and file management.

## What is the GoLive/LiveMotion Pack?

The Pack is a special bundle which gives Web professionals the toolset needed to create and script animations, as well as develop, manage, and deploy Web content. The Pack is available at a price of \$449 (US).

## How does GoLive 6.0 work with Netscape Navigator?

In order to comply with the latest W3C standards, Netscape Navigator 6.x (NN6) changed its Document Object Model (DOM). At that time, Adobe Systems released a special extension for Adobe GoLive 5.0 in order to comply with the NN6 Layer Model while also updating JavaScript code to make GoLive Actions NN6 compliant.

The release of Adobe GoLive 6.0 fully incorporates these changes to ensure full-compliance, so that all JavaScript Actions powered by Adobe GoLive 6.0 function properly. No separate extension or install is necessary. The result is the highest degree of confidence that the page you create in Adobe GoLive 6.0 will display and behave consistently across multiple browser versions, including Netscape Navigator 6.x.

## When will GoLive be available? What is the estimated street price?

The English-language version of Adobe GoLive 6.0 is expected to ship in the first quarter of 2002.

The estimated price for GoLive 6.0 is \$399 (US). GoLive 6.0 will also be available as a bundle with LiveMotion 2.0 at a price of \$449 (US) and will be included in the Adobe Web Collection (Photoshop, Illustrator, GoLive, and LiveMotion) for \$999 (US).

## Which languages will GoLive 6.0 support?

English, French, French Canadian, German, Japanese, Italian, Spanish, Swedish and Dutch.
