Enhance WebSTAR™ with these exciting add-on Toolkits

Send in your WebSTAR registration card today, and we'll send you a coupon **to save 20%** on the Security Toolkit and Commerce Toolkit for WebSTAR! The **Security Toolkit** provides authentication and encryption capabilities for WebSTAR using the Secure Sockets Layer protocol (SSL). This ensures that connections between WebSTAR and Web clients are completely private. Whether you want to take credit card information over the Internet, or transmit confidential records within your organization, the Security Toolkit provides everything you need to protect your data.

The **Commerce Toolkit** adds support to WebSTAR for the First Virtual Internet Payment System™. With this exciting add-on, Internet customers simply connect to the WebSTAR server and fill in an on-line order form, and presto! They've purchased your information, services, or products. The Commerce Toolkit automatically verifies the buyer with the First Virtual system and then notifies WebSTAR to complete the transaction. Whether you're a budding entrepreneur, a large corporation or even a University department, start marketing to the biggest on-line community in the world...with WebSTAR!

And save on ListSTAR™, the easy Listserver for Macintosh

Send in your WebSTAR registration card today, and we'll send you a coupon **to save 20%** on ListSTAR, the ultimate companion product for your WebSTAR site. ListSTAR helps you connect your site to the Internet with two of its most widely used services: Listserver mailing lists and EMail-On-Demand systems (similar to Fax-On-Demand, but over e-mail!). Classroom schedules, product information, or even software...you name it and ListSTAR automatically makes it available via e-mail 24 hours a day!
